Profile

Product Manager with 10+ years of experience and a foundation in software engineering and data, building and scaling B2B and B2C SaaS products serving 13M+ users and generating \$17M+ in annual revenue. Expertise in growth, monetization, activation, experimentation, AI-powered products, CRM, global payments, and 0→1 product development. At CVS Health, I lead cross-functional initiatives across UX, Data Science, Engineering, and Operations, aligning 6 teams, 200+ contributors, and 30+ stakeholders to deliver measurable business and customer outcomes

Experience

CVS Health

Product Manager - AI & Digital Products

San Francisco, USA

February 2024 – Present

- **Agentic AI Platform:** Drove 0→1 delivery of a HIPAA-compliant multi-agent AI assistant leveraging GenAI, RAG, LLM routing, and agent orchestration across Salesforce and SharePoint, supporting 50K+ monthly queries and reducing support costs by 20%.
- **Predictive Analytics and ML Engine:** Built a multi-layer ML health scoring system, leveraging behavioral and wearable data to deliver real-time health scores and next-best-action recommendations, accelerating member activation by 15%.
- **Metrics & KPIs:** Introduced a membership tiering system unlocking premium perks, boosting feature adoption by 10%.
- **Customer-Centric Mindset:** Designed, scaled and launched gamified features (badges, streaks, team challenges) to drive social motivation and increase user engagement by 30% for a Health & Wellness app.
- **Data-Driven Decision Making:** Led A/B experimentation and 0→1 onboarding platform redesign for a Health & Wellness app serving 13M+ users, improving identity flows and instrumentation to increase activation by 20%.
- **Product Vision & Strategy:** Led product strategy and scale-up of a wallet and incentives platform powering \$17M+ GMV; strengthened fraud-resilient redemption and fulfillment systems (12-hour SLA), contributing to ~30% YoY revenue growth.

Autodesk

GTM Product Manager

San Francisco, USA

January 2022 – September 2023

- **Cross-Functional Collaboration:** Partnered with UX and engineering to make trade-offs and drive automation of renewal and premium account workflows within \$5B+ ARR subscription system; improved retention by 7% through lifecycle optimization.
- **Customer-Centric Mindset:** Launched a Voice-of-Customer (VoC) Dashboard for Customer Success, aggregating social, survey, and call data to surface at-risk users, prioritize detractor re-engagement, lifting NPS by 20 points.
- **Decision Making under Uncertainty:** Led a pilot to expand into emerging markets, testing an outsourced customer success model; built A/B experiments with data science to validate cost and revenue impact and inform a go/no-go decision
- **Data-Driven Decision Making:** Designed a personalized checkout experience, leveraging targeted upsell promotions to drive 10% revenue growth.

Tredence Inc.

Data Science Intern

San Francisco, USA

August 2021 – November 2021

- Built a machine learning framework to automate A/B testing for e-commerce clients, reducing turnaround time by 20%.

Merck KGaA

Project Lead

Bangalore, India

January 2020 – December 2020

- Analyzed the user journey and behavior to identify features for nurture marketing that grew the customer base by 20%.
- Planned and led end-to-end sprint deliverables across a global team, launching features including multi-keyword search and third-party API integrations that increased the average session duration by 30%.

Yash Technologies

Senior Software Engineer

Bangalore, India

April 2018 – January 2020

- Analyzed user purchasing behavior for the product and implemented bundle offerings at checkout, increasing revenue by 15%.
- Led a cross-functional team reviewing code for user onboarding, ensuring a 25% improvement in average page response time.
- Designed and implemented seamless login, registration, and onboarding flows with role-based access (SuperUsers) to retain users transitioning between organizations, improving continuity and reducing churn by 25%.
- Introduced live tracking for product requests and orders, and report generation for customers, reducing lead time by 30%.
