Profile

Senior Product Manager with 10+ years of experience spanning software engineering, AI, data, and product management, building B2B and B2C SaaS products serving 18M+ users and generating \$17M+ YoY revenue. Expertise in product strategy, agentic AI, experimentation, growth, monetization, 0→1 product development, and leading cross-functional initiatives across 150+ contributors, and 30+ stakeholders. Currently leading AI product strategy for Fortune 1000 healthcare clients at Brillio, translating business challenges into production-ready GenAI solutions with engineering, data science, UX, and executive stakeholders.

Experience

Brillio **San Francisco, USA**
Senior Product Manager, AI Products *July 2026 – Present*

- **AI Product Strategy & Delivery:** Owned end-to-end AI product discovery, strategy, and delivery for Fortune 1000 healthcare clients, translating ambiguous business problems into production-ready GenAI products and AI transformation roadmaps.

CVS Health **San Francisco, USA**
Product Manager, AI & Digital Products *February 2024 – July 2026*

- **Agentic AI Platform:** Drove 0→1 delivery of a HIPAA-compliant multi-agent AI assistant leveraging GenAI, RAG, LLM routing, and agent orchestration across Salesforce and SharePoint, supporting 50K+ monthly queries and reducing support costs by 20%.
- **Product Vision & Strategy:** Owned product strategy for a \$17M+ GMV digital wallet, aligning 5 cross-functional teams, 70+ contributors, and 10+ stakeholders to deliver fraud-resilient redemption capabilities, driving ~30% YoY revenue growth.
- **Predictive Analytics and ML:** Defined product vision for an ML powered health scoring system, leveraging behavioral and wearable data to deliver real-time health scores and next-best-action recommendations, accelerating member activation by 15%.
- **Data-Driven Decision Making:** Led A/B experimentation and 0→1 onboarding platform redesign for a Health & Wellness app serving 18M+ users, improving identity flows and instrumentation to increase activation by 20%.
- **Customer-Centric Mindset:** Designed, scaled and launched gamified features (badges, streaks, team challenges) to drive social motivation and increase user engagement by 30% for a Health & Wellness app.
- **Metrics & KPIs:** Launched a membership tiering system unlocking premium perks, boosting feature adoption by 10%.

Autodesk **San Francisco, USA**
Product Owner, Go To Market Platform *January 2022 – September 2023*

- **Cross-Functional Collaboration:** Partnered with UX and engineering to make trade-offs and drive automation of renewal and premium account workflows within \$5B+ ARR subscription system; improved retention by 7% through lifecycle optimization.
- **Customer-Centric Mindset:** Launched a Voice-of-Customer (VoC) Dashboard for Customer Success, aggregating social, survey, and call data to surface at-risk users, prioritize detractor re-engagement, lifting NPS by 20 points.
- **Decision Making under Uncertainty:** Led a pilot to expand into emerging markets, testing an outsourced customer success model; built A/B experiments with data science to validate cost and revenue impact and inform a go/no-go decision
- **Data-Driven Decision Making:** Designed a personalized checkout experience, leveraging targeted upsell promotions to drive 10% revenue growth.

Merck KGaA **Bangalore, India**
Project Lead *January 2020 – December 2020*

- Analyzed the user journey and behavior to identify features for nurture marketing that grew the customer base by 20%.
- Planned and led end-to-end sprint deliverables across a global team, launching features including multi-keyword search and third-party API integrations that increased the average session duration by 30%.

Yash Technologies **Bangalore, India**
Software Engineer *April 2018 – January 2020*

- Analyzed user purchasing behavior for the product and implemented bundle offerings at checkout, increasing revenue by 15%.
- Led a cross-functional team reviewing code for user onboarding, ensuring a 25% improvement in average page response time.
- Designed role-based login, registration, and onboarding flows enabling seamless org transitions, reducing user churn by 25%.
- Introduced live tracking for product requests and orders, and report generation for customers, reducing lead time by 30%.

Education

Purdue University, Krannert School of Management **West Lafayette, USA**
Master of Science in Business Analytics and Information Management *December 2021*

Rajiv Gandhi Technical University **Indore, India**
Bachelor of Engineering in Information Technology *June 2015*
